

270Ah 12V LiFePO₄ Deep Cycle Battery

Model DFGC3

This 12V deep cycle 270 Ah battery weighs roughly 80 lbs. Utilizing the same stable LiFePO₄ chemical composition and built-in battery management system (BMS) technology as our other products, the GC3 is one of the most unique deep cycle batteries on the market.

The GC3 offers a form factor that no other battery on the market has. With unlimited possibilities and 270 Ah of power this battery is ideal for any application and maximizing your system's space and power. This battery is capable of being discharged to a 100% depth of discharge and charges 5 times faster than lead-acid. The GC3 allows for greater flexibility in what you can power and how you install it, providing energy independence that other batteries cannot.

Designed & Assembled
in the USA

*Heated Option Also Available

Specifications

- 270 Amp Hour, 12 Volt Battery
- LiFePO₄ Chemistry
- 3000-5000 Cycles
- Dimensions (L x W x H):
21.29" x 11.59" x 10.01"
- 81.4 lbs.
- Operating Temp Range:
-4°F (-20°C) to 135°F (57.2°C)
- Water Resistant and Sealed
(Batteries should not be submerged)
- Built-in BMS
(Battery Management System)
- Designed and Assembled
in the USA

Charging Parameters

- Absorption Voltage:
14.2V to 14.6V
- Float Voltage:
13.4V to 13.8V
- Equalization Voltage:
14.4V (if Applicable)
- Absorption Time:
60 to 90 minutes per
270Ah battery bank
- No Temperature
Compensation

Built-in Battery Management System

- 300 Amps Continuous
- 500 Amps Surge for 30 Seconds
- ½ Second Surge for Loads Over
500 Amps
- High/Low Voltage Protection
- Short Circuit Protection
- High/Low Temperature Protection
- Cold Charging Protection
- Automatic Cell Balancing at Top
of Charge

Please Note: This built-in protection will reset after 5 seconds in most fault conditions. Disconnecting the battery from loads will also reset the BMS.

Leading the "Lead is Dead" Revolution

At Dragonfly Energy, we're creating a new standard in green energy storage. Our team of battery experts works diligently to find new ways for you to get more mileage out of your RV, boat, and off-grid systems, and we design and assemble every battery in the USA because quality isn't only a standard but our highest expectation.

Make the switch *from* lead-acid, make the switch *to* lithium!

Batteries

Dragonfly Energy offers a full line of lithium-ion deep cycle batteries for 12-volt, 24-volt and 48-volt systems, the ultimate replacements for traditional lead acid batteries and relief of battery anxiety... Lead Is Dead. Implementing the latest technologies and producing products with efficiency, safety, and performance in mind, our LiFePO4 batteries are designed to keep you out there longer, wherever that might be.

Technical Support

Dragonfly is not only revolutionizing the industry in green energy storage, but in technical and sales support too. Our in-house team is here to provide an extraordinary customer experience, lifetime support, and valuable resources and information to make your switch to lithium exactly the way you envision.

What Makes Dragonfly Different?

When you replace your traditional lead-acid battery with a Dragonfly Energy lithium-ion battery, you can expect a few things—5,000 to be exact. Each Dragonfly Energy LiFePO4 battery is capable of 3,000-5,000 charge cycles*, is lighter in weight and is equipped with an internal Battery Management System (BMS) to protect your battery and its longevity.

* Under most usage scenarios, after 3000 - 5000 cycles, approximately 75% of battery capacity remains.

Dragonfly Energy researches, designs, and assembles the most advanced deep cycle lithium-ion batteries in the world. Get in touch for partnership, wholesale, and distribution opportunities today!
