

# MIDNITE SOLAR

1936 Pan Am Clipper

# Clipper & Classic

## Clipper

The MidNite Clipper was designed to work in conjunction with the Classic MPPT Controller to give you safe reliable control of your wind turbine while also giving you true three stage charging of your batteries. The combination of the Clipper and the Classic has been proven to increase daily harvest up to 250% as well as peak power by 300% on some turbines.

- Three stage charging
- Reduces wear & tear on turbine
- Reduces noise from turbine  
controllable noise level
- AC and DC models from 1500 to 4000 watts

## Classic MPPT Charge Controller

The Classic substantially increases the flexibility, features and range currently found on MPPT controllers. It is also now the standard wind controller supplied by many US, Canadian and African wind turbine companies.

*Designed and Assembled in the USA  
using many American  
components.*
