

Wire & Conduit Management Solutions

The Best Wire & Conduit Management of any Racking System

All products ship from the factory with nuts and bolts preassembled for ease of install

The industry's most complete product offering for wire and conduit management solutions

Products keep wires neatly organized providing a clean finished look to every install

Can be installed at any time allowing easy retrofit of existing systems

Keep your wires & conduit organized with SnapNrack solutions today

SnapNrack Wire and Conduit Management Solutions

comprise a set of dedicated products to reliably and cost effectively secure PV module and microinverter leads. These solutions will not only provide a high quality wire and conduit management solution for the life of the system, but will provide a faster and easier installation.

Junction Box

- Quick and easy installation utilizing snap-in features
- NEMA 4x rating to conceal and protect electrical connections
- Now two junction boxes available in different sizes for multiple wire management situations

Standard Rail Channel & Wire Retention Clips

- The ONLY rail channel in the industry with space for running wires and cables
- Wire Retention Clip snaps into place securing PV conductor and AC trunk lines within channel

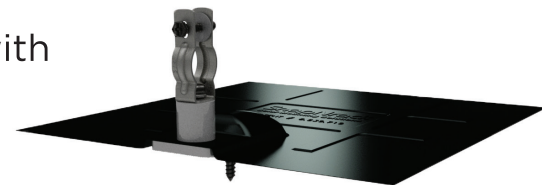

Wire Clamp Offering

- New Universal Wire Clamp can hold Enphase IQ Cables as well as 4 PV Wires
- Easily attaches to standard rail using channel nut and single bolt with 1/2" socket

Conduit Clamp

- Flashed composition support attaches to roof with single lag bolt
- Tile support requires no tools to attach to tiles
- Secure conduit in clamp using single 1/2" socket
- Works with all 3/4" standard EMT conduit

Quality. Innovative. Superior.

SnapNrack Solar Mounting Solutions are engineered to optimize material use and labor resources and improve overall installation quality and safety.
