

SpeedSeal™ DeckTrack

Direct to Deck Attachment for RL Universal

Eliminates locating
rafters & pilot holes

Ability to mount on
specialty roof types

Features SpeedSeal™
Technology

Complete compatibility
with existing RL
Universal Mounts

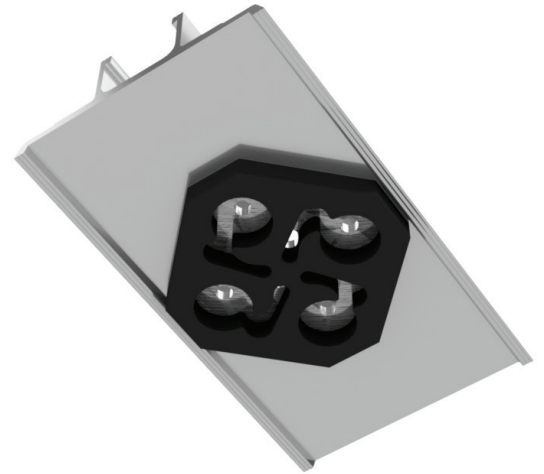

Start Installing the DeckTrack Today

The SpeedSeal™ DeckTrack

is part of a new generation of roof attachments for RL Universal, featuring an innovative design that incorporates SpeedSeal™ Technology into a single roof attachment that mounts directly to the deck.

Ultimate Rooftop Versatility

- Allows for layout adjustability on the roof without the need to locate & attach to rafters
- Familiar SpeedSeal™ Technology with compressible barrier that secures sealant in place & fills voids
- Ability to mount on specialty roof structures without standard rafters including TJI's, metal rafters, tongue & groove, and manufactured homes

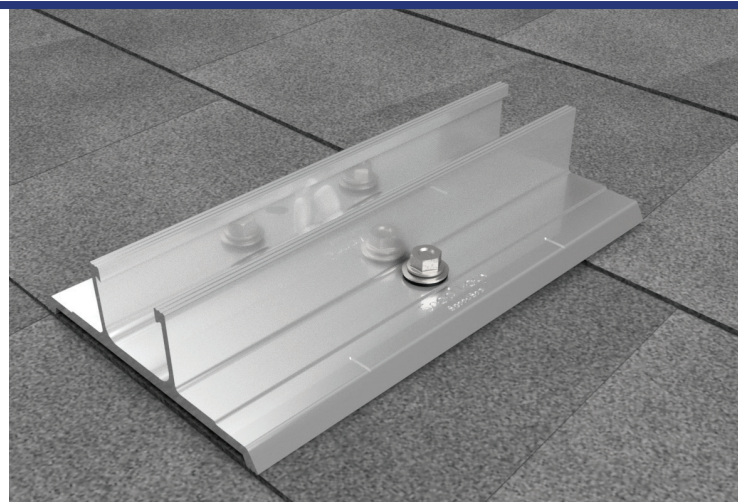

Eliminate Disruption on the Roof

- Maintain the roof integrity, no prying up shingles
- Each screw independently sealed
- Sealant venting ports indicate proper seal

Rafter Independent Attachment

- Eliminates the need to locate or find rafters for pilot holes
- Single attachment secured straight to the roof

Quality. Innovative. Superior.

SnapNrack Solar Mounting Solutions are engineered to optimize material use and labor resources and improve overall installation quality and safety.
