Direct to Deck Attachment for Ultra Rail

Eliminates locating
rafters & pilot holes

Ability to mount on
specialty roof types

Features SpeedSeal™
Technology

Pre-assembled with
L Foot & Ultra Rail
Mount

Start Installing the DeckFoot Today

The SpeedSeal™ DeckFoot

is part of a new generation of roof attachments for Ultra Rail, featuring an innovative design that incorporates SpeedSeal™ Technology into a single roof attachment that mounts directly to the deck.

Ultimate Rooftop Versatility

- Allows for layout adjustability on the roof without the need to locate & attach to rafters
- Familiar SpeedSeal™ Technology with compressible barrier that secures sealant in place & fills voids
- Ability to mount on specialty roof structures without standard rafters including TJI's, metal rafters, tongue & groove, and manufactured homes

Eliminate Disruption on the Roof

- Maintain the roof integrity, no prying up shingles
- Each screw independently sealed
- Sealant venting ports indicate proper seal

Rafter Independent Attachment

- Eliminates the need to locate or find rafters for pilot holes
- Single attachment secured straight to the roof

Quality. Innovative. Superior.

SnapNrack Solar Mounting Solutions are engineered to optimize material use and labor resources and improve overall installation quality and safety.
